March 2021

## Gender pay gap perceptions

Q.

Which of the following statements comes closest to your view?

## Global Country Averages

Closing the gender pay gap is potentially at risk of stalling as people are divided over whether it should be a priority right now.

Two in five think that closing the gender pay gap is important but should not be a priority right now. This is against near one in five thinking it is either an example of political correctness gone too far or simply fake news.

## Recovery from COVID-19

Q.

As your country recovers from the Coronavirus pandemic in the coming year, do you think that women will become more equal with men, will women become less equal than men, or will things be the same as they were before the pandemic?

Half (52\%) think that gender equality between men and women will revert to what it was before the pandemic.

Q.

Which four or five, if any, of the following, do you think are the most important to ensure that the programme for recovery after the Coronavirus pandemic in [country] addresses issues facing women?

More flexible working practices (40\%) and more support for women and girls who face violence and abuse (36\%) are the top priorities for ensuring that the programme for recovery addresses issues facing women.

## The impact of COVID-19

Taking all the potential effects into account (such as health, economic, and social impacts) do you think the Coronavirus will have a more negative impact on men, women, or will it have the same impact on both?

Across the 28 countries, around two-thirds (64\%) say that Coronavirus has impacted both men and women equally.

Higher proportions in Chile, Israel and Canada say it's been more negative for women.

Much more / little more Country negative for women , Much more / little more negative for men
Q.

As a result of the Coronavirus pandemic, do you think you are now more or less likely to do the following than you did before the crisis started in 2020?

Take actions to improve my health and wellbeing

Women are slightly more likely than men to say that they are taking actions to improve their health and wellbeing than they did before crisis started ( $50 \%$ vs $46 \%$ ).

Take actions to improve my health and wellbeing...

## Gender and work

Q.

For each job, please say whether you think this is a job mostly made up of men, mostly made up of women or is it made up of equal numbers of men and women, and please say whether you think that the salary or wages they are paid are too much, too little or about the right amount for the job that they do.

It doesn't matter if you don't know what their exact wages are, it is just your opinion we are after.

## Q.

For each job, please say whether you think this is a job mostly made up of men, mostly made up of women or is it made up of equal numbers of men and women, and please say whether you think that the salary or wages they are paid are too much, too little or about the right amount for the job that they do.

It doesn't matter if you don't know what their exact wages are, it is just your opinion we are after.

Jobs that are mainly seen as being done by women are also those most likely to be seen as being paid too little.

[^4]For people who provide childcare (such as nursery workers, childminders and nannies), please say whether you think this is a job mostly made up of men, mostly made up of women or is it made up of equal numbers of men and women, and please say whether you think that the salary or wages they are paid are too much, too little or about the right amount for the job that they do.

It doesn't matter if you don't know what their exact wages are, it is just your opinion we are after.

These are the results of a 28 -country survey conducted by Ipsos on its Global Advisor online platform. Ipsos interviewed a total of 20,520 adults aged 18-74 in the United States, Canada, Israel, Malaysia, South Africa, and Turkey, and 16-74 in 21 other markets between 22 January - 5 February 2021.

The sample consists of approximately 1,000 individuals in each of Australia, Belgium, Brazil, Canada, mainland China, France, Germany, Great Britain, Italy, Japan, Spain, and the U.S., and 500 individuals in each of Argentina, Chile, Hungary, Hong Kong, India, Israel, Malaysia, Mexico, the Netherlands, Peru, Poland, Russia, Saudi Arabia, South Africa, South Korea, Sweden, and Turkey.

The samples in Argentina, Australia, Belgium, Canada, France, Germany, Great Britain, Hungary, Italy, Japan, the Netherlands, Poland, South Korea, Spain, Sweden, and the U.S. can be taken as representative of their general adult population under the age of 75 .

The samples in Brazil, Chile, mainland China, India, Israel, Malaysia, Mexico, Peru, Russia, Saudi Arabia, South Africa, and Turkey are more urban, more educated, and/or more affluent than the general population. The survey results for these markets should be viewed as reflecting the views of the more "connected" segment of their population.

The data is weighted so that each country's sample composition best reflects the demographic profile of the adult population according to the most recent census data.

Where results do not sum to 100 or the 'difference' appears to be $+/-1$ more/less than the actual, this may be due to rounding, multiple responses, or the exclusion of "don't know" or not stated responses.

The precision of Ipsos online polls is calculated using a credibility interval with a poll of 1,000 accurate to $+/-3.5$ percentage points and of 500 accurate to $+/-5.0$ percentage points. For more information on Ipsos' use of credibility intervals, please visit the lpsos website. The publication of these findings abides by local rules and regulations.
